# VENTILATION SYSTEM

## Ventilation System

Don't worry about a sick house syndrome, impure room air and atopic dermatitis!

KOCOM's Super Clean Total Heat Exchanger will keep your family and their health.

KOCOM ventilation system is able to reduce energy and offer more fresh air by collecting and reserving 70% thermal energy via a heat recovery ventilator (total heat exchanger) unlike the existing ventilation system which has only the function of air circulation without recycling the thermal energy of indoor air-conditioning and heating.

Also, all products of KOCOM ventilation system are eco-friendly because it acquired certificate for high energy equipment from Korea Energy Management Corporation.
